ant fifteen years with a lung trouble. Several seembers of the family on my mother's side of the house had died with consumption, and the doc-tors were s'l agreed in their opinion that I had consumption also I had all the distressing symp-toms of that learning discount I have a reserved.

the point of the shoulder will have a good effect. Keep her quiet and feed light diet. Rub the muscles well with a good, stiff brush and let me know the result in three

labor for several years. By chance I came into possession of a pamphlet on "Blood and Skin Disease," from the office of Swift Specific Co., At-Bapture.
D. L., Basnett, W. Va.—I have a horse sants, ess. A Friend re-ommended the use of Swill's Specific claiming that he himself had been greatly benefited claiming that he himself had been greatly benefited by its use in some lung troubles. I revolved to try it. About four years ago I commenced to take S. S. S. according to directions. I found it an invigorating tonic, and have used about fifty bottles. The results are most remarkable. My cough less left use, my strongth has reduced to the second of the second of the results are not remarkable. My cough less left use, my strongth has reduced in my like. It has been three years since I stopped the use of the medicine, but I have had no return or the disease, and there are no pains or weakness felt un my lungs. I do the hardest kind of mechanical work, and feel as well as I ever felt since I was a boy. These, I know, are wonderful statements to make, but I am honest when I say that I was a boy. These, I know, are wonderful statements to make, but I am honest when I say that while it is the only medicine that brought me any permanent relief. I do not say that swift's specific will do this in ever case, but most positively affirm that it has done this muon for me, and I would be recream to the duty I owe to suffering humanity If I had failed to bear this cheerful testimous to the ments of this wendeskin medicine. I am well known in the city of Montynerry, and can refer to some of the order testiment Montgomery, Ala, June 25, 1835.

Swift's Specific is entirely vegetable. Treatise on b. L., BASNET, W. VA.—I have a norse that was kicked in the side about three weeks ago. He was sick at the time but got over it. Now there is a lump about the size of a goose egg which, when it is pressed on, will go back and you can feel a hole. What is wrong and what ought I do for it? lo for it?

Answen.—Your animal has been rup-ANAWER.—Your animal has been rup-tured. Place a compress bandage over the part and keep it on until the enlarge-ment has been removed and the hole is closed, when it may be advisable to use a counter irritant over the part.

Unsonndness. Unsoandeess. N. C, LEWIS MILLS, OHIO:—What is unsoundness in a horse? By answering the question you will oblige a subscriber. ANSWER—Anything that depreciates his value or interferes with his ussfulness is said to constitute unsoundness.

J. B. M., Pocataligo, W. Va.—I have a good young horse that got his foot fas-tened in a crack in the stable. In trying to extricate himself he tore off the shoe.

For sale by Logan & Co. and Laughlin Bros. & Co. nos-naw tened in a crack in the stable. In trying to extricate himself he tore off the shoe, bruised and cut his foot above the kaof very badly and became lame. The foot is swollen and somewhat larger than the other one. He got some better of the lameness, and I put him to the wagon. During the day he fell down twice and hurt his knee, (the same leg which got turt in the stable.) Right below the knee cap a knot formed about the size of a goose egg. It is soft and "spooty." I stuck my knife into the place, from which blood flowed freely. The next day the knot was as large as ever, and remains that way. The knee is not a particle sore. There is a little fever in the morning. What puzzles me is where he hurt his knee. Most of the swelling went out of the foot, but came back again in four or five days. In the morning the fcot is swollen the worst. came back again in loar of averlays. In the morning the fcot is swollen the worst. He limps all the time, some days worse than others. I would like to obtain a sure remedy for it, if possible, and to know what it should be called. To be more cor-

what it should be galled. To be more correct, the scars on the foot are all healed up but very sore. He will jetk his foot oup every time I lay my hand on it. He eats very hearty and stands square on his rest at the front. Should I work him? How long will he be is getting well?

Assware—The injury causing the lameness is at the foot. To it apply a good strong blister. The injury at the knee will have to be aspirated out as often as it stills up, and then inject in a solution of itodins. After this part is reduced and does not all up rub on the following ointment: Hydragicum ben. iod., ospeirasim, cosmoline, one ounce. Mix well and rub on the part once a day for seven days. Give light diet and complete rest until he is all right. Could eat nothing!!!
My sufferings were so that I called two doctors to give me something that would stop the pain.
Their efforts were no good to me.
At last I heard a good deal
"About your Hop Bitters!
And determined to try them."
Got a bottls—in four hours I took the contents of one!!! Next day I was out of bed, and have not seen a is all right.

when and flow healthy bile into the promoting and flow healthy bile into the prome channel. It relaxes without we keening or can wisking the bowels, and others that it regularly, it arents to thematism, depuraling the blood and increasing the activity of the key look and it is remedy in creaming the bills. the English Shire draft, In 1881 it is stated that the number of horses exported from Canada was 22,000, and the value \$2,09,000. In 1884 there were 11,595 horses exported and the value was \$1,617,829. The value of horses increased from \$55 to \$140 in three years.

creased from \$50 to \$140 in three years.

The United Kingdom had 1,909,200 horses last June, against 1,904,515 a year before. Of these about two-thirds are used for agriculture and other industrial purposes, and the large proportion of nearly one-third are used solely for breeding. Few other countries can show such a relative magnitude of the breeding in-

Whether the farmer who has surplus Whether the farmer who has surplus you have young horacs for sale from year to year gets \$75 per head or \$150 per head is a matter lying wholly within his own regulation. The latter figure is as positively of shiloh within reach as the former, if he will only pay for the kind of stallion service which will secure it. The difference in the production of the two types of horselesh. Patrons of the cheapest stallions, do not see the point?
